Case Study

Connell Wagner

No.2

“The ability to be able to match the way that documents were distributed manually by Connell Wagner is one of the primary reasons that QDMS was chosen as our corporate standard.

Today Connell Wagner use QDMS across offices in Australian and New Zealand for document control on more than 500 projects”

Anthony Bayadi  
CAD Manager  
Connell Wagner

Project Collaboration

## Connell Wagner use QDMS as a Corporate Standard in 15 offices

*Connell Wagner is one of the leading consulting groups in the Asia Pacific region, with a large international presence. Specialising in the planning, surveying, engineering design and project management of major infrastructure, commercial and industrial projects, Connell Wagner has a total staff of over 1400.*

With more that 15 offices around Australia and New Zealand using QDMS for all their project drawing document control, Connell Wagner have made the QDMS system a key part of their project management procedures.

A traditional multi disciplinary consultancy, Connell Wager reviewed more than 20 of the leading document management systems from around the globe before deciding to standardise on QDMS3. One

of the main reasons for their decision was the ability of QDMS to be able to handle the traditional transmittal matrix format that the senior engineers at CW were used to.

Based on the existing transmittal to a distribution matrix alternative in QDMS, QA Software further developed this methodology for Connell Wagner to precisely suit their business practices.

## Case Study

QA Software

No.2

Connell Wagner staff can set up their distribution packages in QDMS for both internal documents and shop drawings, and then simply tick documents and recipients within a package when generating transmittals. The transmittal output has been completely customised to mirror a traditional document issue sheet used by many consultants still around the globe.

Anthony Bayadi, CAD Manager at Connell Wagner's Sydney office states: "For the past 12 months we have been conducting a program to standardise the CAD and document management practices across all of the offices of Connell Wagner. While QDMS has been our standard for document control since 1997, we recently spent several months seeing where the major CAD vendors and others overseas had got to on document control. Much to our surprise, QDMS was still the only system we could find that gave us the key functionality we required, in an easy to use package that was affordable for us to standardise on for over 120 licensed uses across 15 offices."

QA Software have worked closely with Connell Wagner during 2000 to train staff in the major offices and ensure the QDMS system is implemented to maximum advantage.
